## SUMMARY

Software Engineering student with a strong interest in building practical, user-focused digital solutions. Demonstrates adaptability, clear communication, and effective collaboration in team and community settings. Motivated to gain hands-on industry experience while continuously developing technical and problem-solving skills.

## EDUCATION

### Bachelor of Science: Software Engineering

Adventist University of Central Africa

Expected in 11/2026

Kigali, Rwanda

### High School Diploma: Mathematics, Physics, Computer Science

College Saint Andre

11/2022

Kigali, Rwanda

## CERTIFICATIONS

- Cisco Networking Basics - 2024
- Introduction to Network Operations(Internet Society) - 2024
- Advanced Network Operations by Internet Society - 2024
- Figma, UI/UX design by Udemy - 2026

## VOLUNTEER EXPERIENCE AND PROJECTS

**Seven United for the Needy (SUN):** an NGO based in Rwanda, whose mission is to provide children from low-income backgrounds with access to education by empowering youth to lead service projects that support and uplift their communities.

- Participated in different activities around the country in Rwanda, helping the needy in their various and essential needs.
- Served under the role of Communication Officer, aiming at helping the members get informed on time about all the activities that are to take place and also bring everyone together.

### Pet Adoption Website:

Developed a responsive pet adoption website featuring user registration and login, searchable pet listings, and an adoption request workflow.

- Implemented backend functionality for managing pets and adoption requests using PHP and MySQL.
- Client-side interactivity and form validation using JavaScript. Focused on usability, clean design, and secure data handling.
